

# WALK & WORK TREADMILL DESK TR1200 DT5

WORK WHILE YOU WALK WITH THE VERY BEST TREADMILL TECHNOLOGY

The LifeSpan TreadMill Desk leverages 45 years of quality and biomechanics excellence from the industry- leaders at LifeSpan Fitness. Blending simple movement into the workday increases productivity, boosts metabolism and encourages healthy behavior, while preventing the risks of prolonged sitting.

Designed to complement the workplace in form and function, the TR1200 TreadMill Desk is equipped with a silent motor, speeds that are optimal for walking while working, and a sturdy design ideal for community or individual use.

## KEY FEATURES

Productivity has never been exclusive to an assigned seat. Gone are the days of static, fixed workplaces. Employees are at their best when they are unchained from an allotted, stationary desk.

Unbridle your office space from archaic, stagnant philosophies by encouraging motion and independence in your communal areas.

- THE WALK & WORK EDGE
- Walking burns 3X more calories than sitting
- Activity in the workplace boost productivity and creativity.
- All new users experience no loss in productivity once accustomed to the product

- Speed: 0.6 Km to 6.6 Km
- Motor: 2.25 HP Continuous-Duty DC
- Warranty: Frame Lifetime, Parts 2 yrs and Labor 1 yr.

# TR1200 DT5 FEATURES

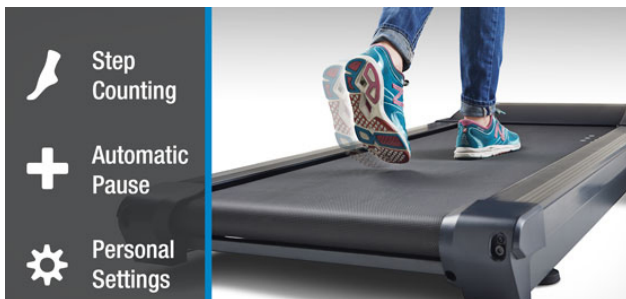

## PROFESSIONAL, HEIGHT ADJUSTABLE DESK

The spacious, professionally-styled desktop adjusts in height electronically (DT7) or manually (DT5) and is ergonomically appropriate for users ranging in stature from 147 cm to 203 cm. The desk is unattached from the treadmill, ensuring that any movement from your activity stays isolated and away from the desktop. The intuitive, built-in console keeps you fully in command and aware of your activity levels.

## MOTOR

One step up from the TR800, the treadmill's motor is finely calibrated to achieve 2.25 hp at 2400 rpm, resulting in whisper-quiet efficiency over longer hours of use. Unlike with traditional fitness treadmills, Workplace motors are precisely crafted to work for hours at low intensities, guaranteeing miles of cool, quiet activity.

## CONSTRUCTION

- 6 Impact-Absorbing Compression Shocks

Unobtrusive and refined, Workplace treadmills are composed of attractive, high-quality steel. Designed for quiet comfort, each treadmill has 6 impact-reducing shock absorbers, allowing you to walk while gently respecting your feet, knees, hips, and back.

## SAFETY

Walk confidently knowing that your safety is assured. Intelli-Guard technology automatically pauses the treadmill after 20 seconds of inactivity, and a traditional safety key carefully ceases belt motion at a moment's notice.
